HTML & Body

```css
* {
    box-sizing: border-box;
    font-family: 'Raleway', sans-serif;
    margin: 0;
    scroll-behavior: smooth;
}
body {
    background-attachment: fixed;
    background-image: linear-gradient(to bottom right, #505050, #292929);
}
```

```css
@media screen and (min-width: 500px) and (max-width: 899px) {
    html {
        font-size: 110%;
    }
    main {
        display: flex;
        flex-direction: column;
        align-items: center;
    }
```

```css
@media screen and (min-width: 900px) {
    html {
        font-size: 115%;
    }
    main {
        display: flex;
        flex-direction: column;
        align-items: center;
    }
    footer {
        position: fixed;
    }
```

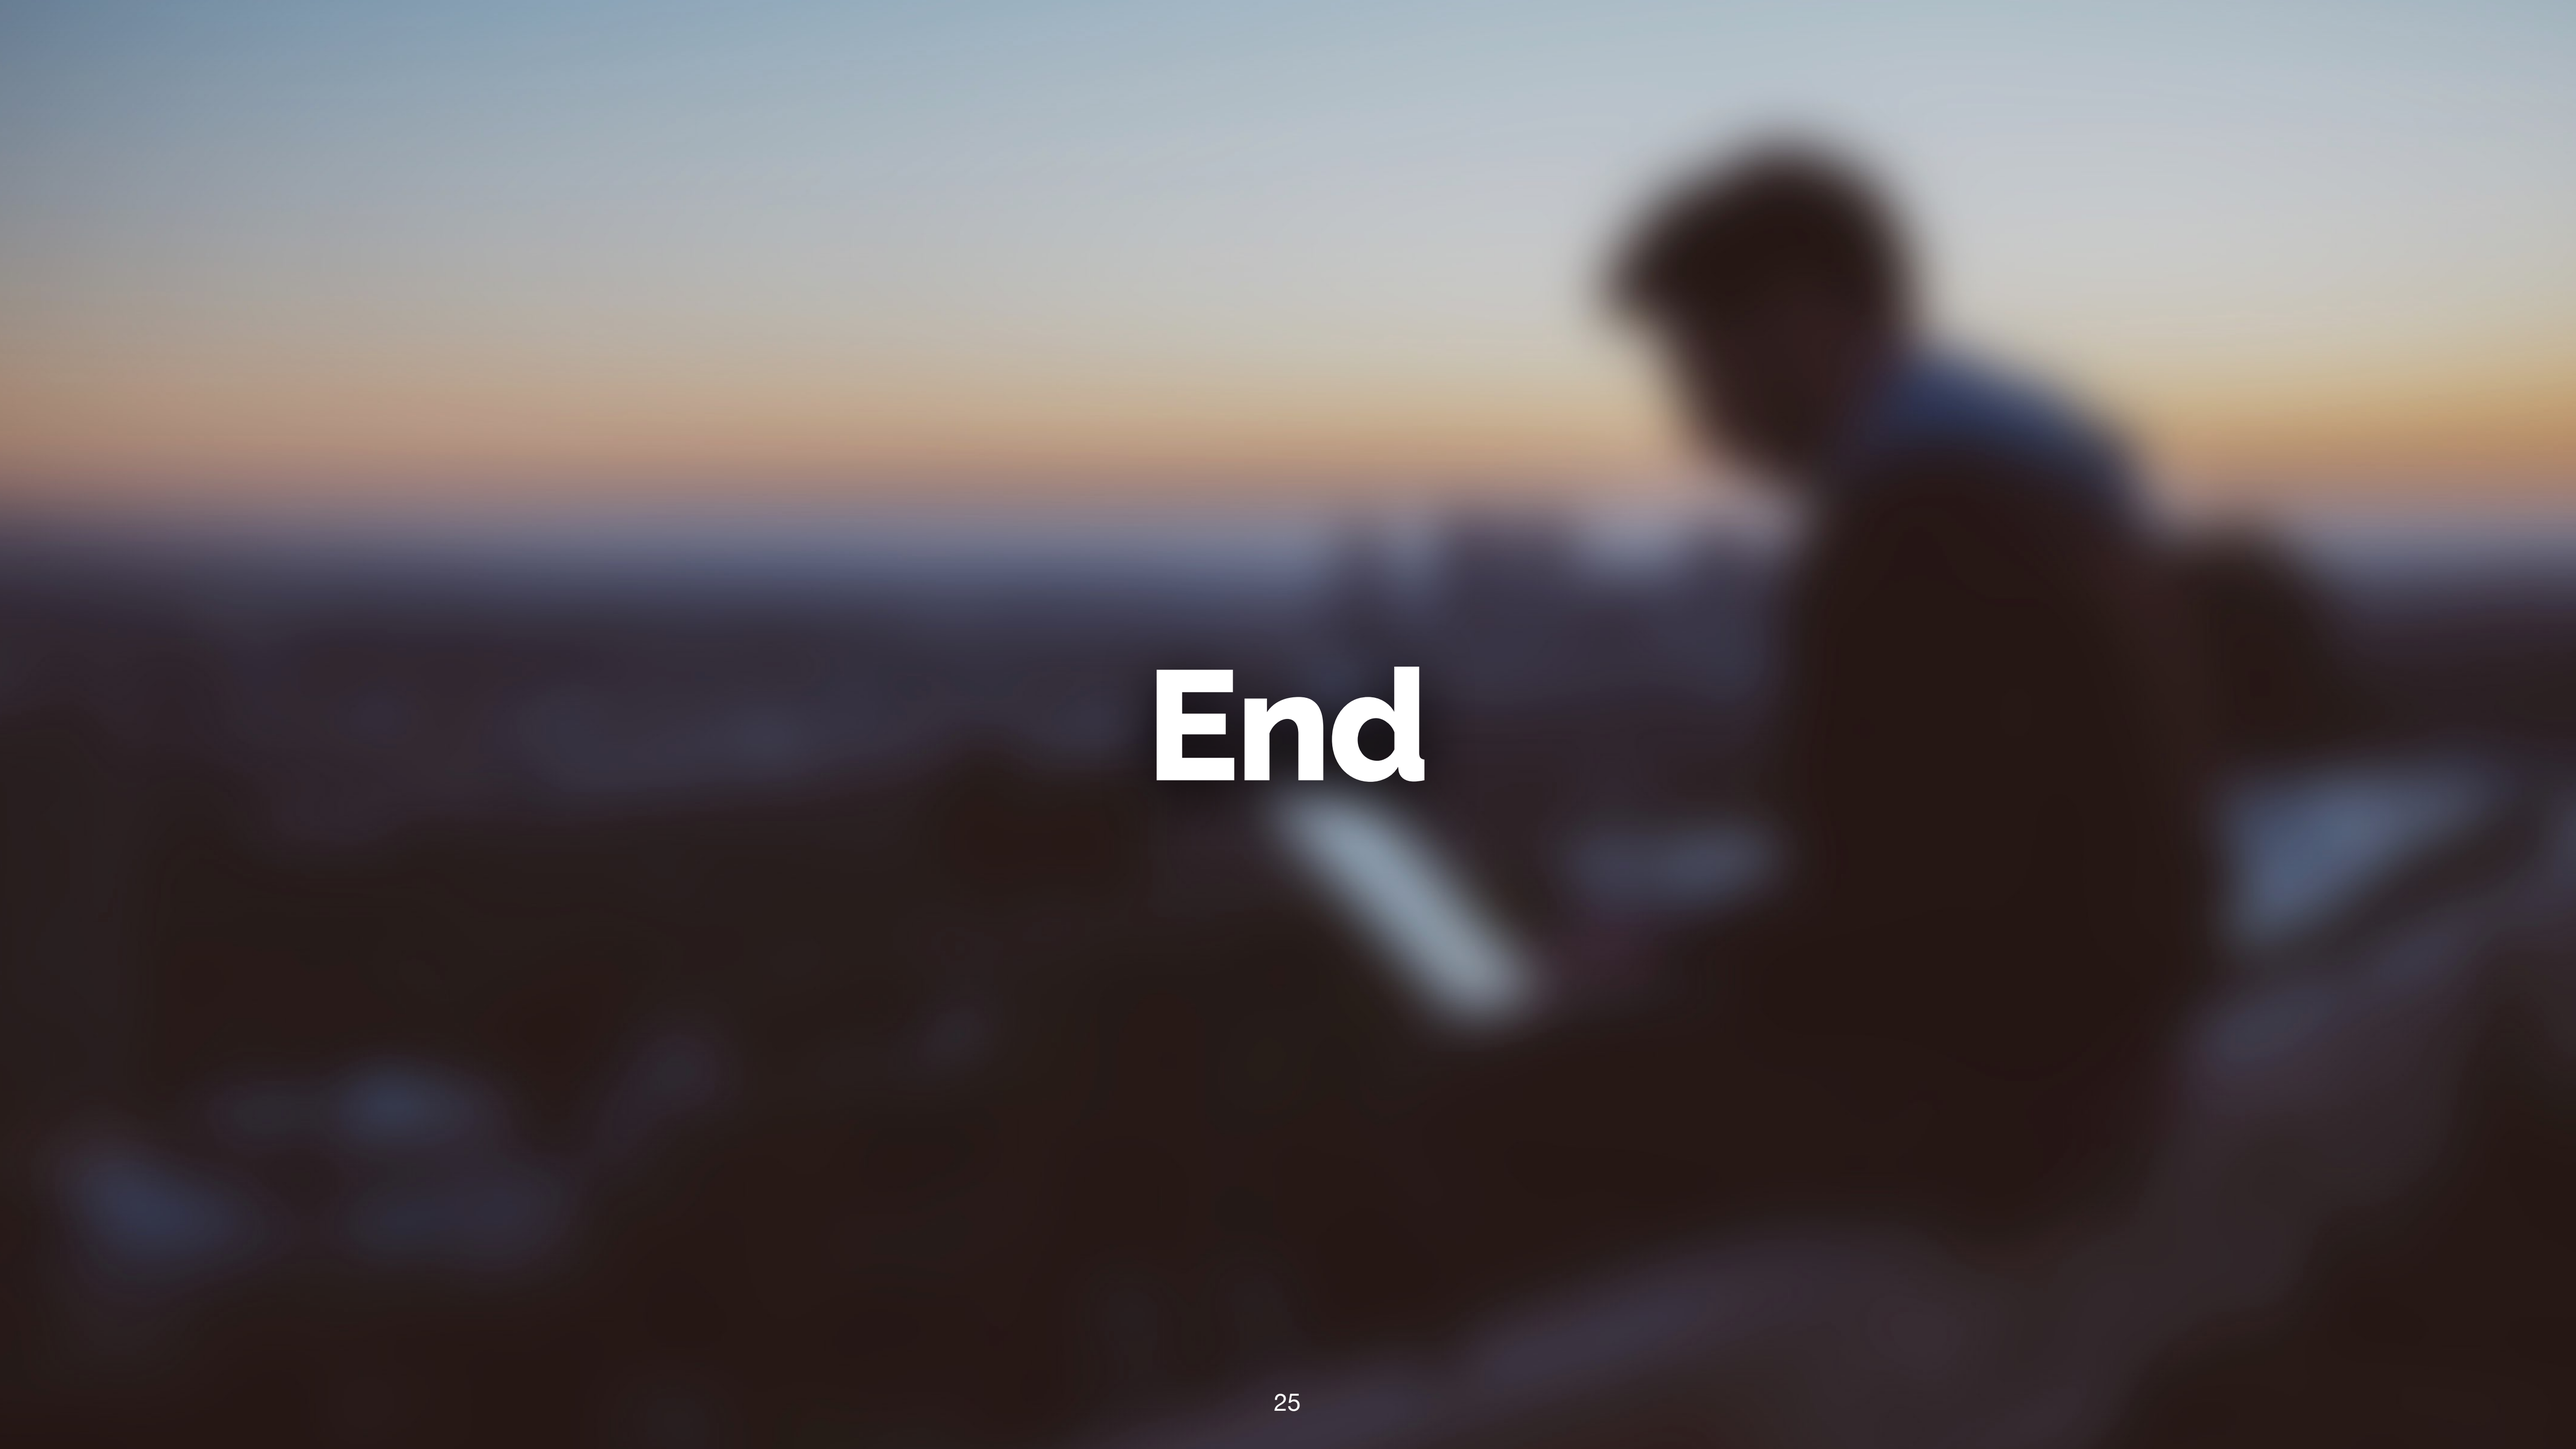
# Challenges & Ethical issues

# Challenges & Ethical issues

- Design - Too many times changes during implementation
- Creativity - Is it ok to use someone else's codes
- Viewport units - It doesn't mean it's good working on every layout
- Commit message - Record changes
- Class names - The reason it can be harder when on team work



# End
